CLASSINGATION SYSTEM AVAILABLE Policy: All facilities will develop and implement a system according to which ICE detainees are classified. The classification system will ensure that each detainee is placed in the appropriate category, physically separated from detainees in other categories Components N NA Remarks The facility has a system for classifying detainees. In CDFs and IGSAs, an Objective Classification System \boxtimes or similar is used. The facility classification system includes: Classifying detainees upon arrival. Separating individuals who cannot be classified upon arrival from the general population. \boxtimes The first-line supervisor or designated classification specialist reviewing every classification decision. The intake/processing officer reviews work-folders, A-X files, etc., to identify and classify each new arrival. Staff use only information that is factual, and reliable to determine classification assignments. Opinions and \boxtimes unsubstantiated/ unconfirmed reports may be filed but are not used to score detainees classifications. Housing assignments are based on classification- \times level. A detainee's classification-level does not affect his/her recreation opportunities. Detainees recreate with \boxtimes persons of similar classification designations. Detainee work assignments are based upon \boxtimes classification designations. The classification process includes reassessment/reclassification. At IGSA's, detainees \boxtimes may request reassessment 60 days after arrival. Procedures exist for a detainee to appeal their classification assignment. Only a designated \boxtimes supervisor or classification specialist has the authority to reduce a classification-level on appeal. Classification appeals are resolved within five business days and detainees are notified of the outcome within \boxtimes 10 business days, Classification designations may be appealed to a higher authority such as the Warden or equivalent. \boxtimes \Box The Detainee Handbook or equivalent for IGSAs explains the classification levels, with the conditions X and restrictions applicable to each.
